Metamorphic, Sedimentary & Igneous

In Science we have had tons of fun learning about rocks and minerals. We observed rocks and minerals up close using our magnifying glasses. Then, we learned how rocks are formed. We even made rocks out of clay. Last, we learned that rocks are made up of two or more minerals; to demonstrate this we made edible rocks!! Next, we will begin learning about *fossils*!!!

This month we had a visit from Aunt Helen's Closet. Aunt Helen traveled to every country in the world except for two! As she traveled she collected clothing and accessories from all of the countries that she visited. Our class had the chance to model clothing from different countries. This was a wonderful experience!

During our last whole school morning meeting we led the greeting!! Next month we will be leading the activity.

- February is Black History Month!!

Quote of the month: I love math. I wish we could do this all day!
Jasmin Cuthrell
