

2B- November News Letter

During the month of November our class has been learning many exciting things. In math, we learned to count money. At the end of our money unit, the students had the chance to earn money by answering math questions correctly. With the money they earned, we set up a school store where they were able to purchase items. The students took turns being the cashiers and the buyers. As the buyers

they needed to choose items that they had enough money for, and give the cashier the correct amount of money. As cashiers they had to count the money and make change if needed. This activity was a very enjoyable learning experience for the children.

volcano.

In Social Studies we have been learning about landforms. The children demonstrated their knowledge by making landforms out of clay, as well as making them with their bodies. We also learned about things that affect landforms such as earthquakes, volcanoes and erosion. In this picture Aiyanna has made a

This has been a very productive month, and we will continue to learn new and exciting things! The next social studies unit will be natural resources!
