

# Mrs. De Leon's 2<sup>nd</sup> Grade News

March 2010

## What happened in March??

In math we learned to tell time. We practiced using time words such as half past, quarter past and quarter to. We even had a time challenge for students. Students could be called on any time during the day to tell the time. We never knew when we would be picked so we had to always be ready! Below is a picture of the class playing time games and using the clocks.

## Peacemaker News!

Our peacemaker for the month of March is Brianna Gettings. Great job and keep up the peaceful work!!

## Dinosaurs!!

During science we learned all about fossils and dinosaurs. Here is a picture of us being paleontologists. We found different kinds of bones and then used the clues to hypothesis what kind of an animal the fossils came from.

In writing we wrote *How To* papers. We used sequencing words to teach others how to do things. We also wrote 2nd grade reflections. For this we looked back at our hopes and dreams that we wrote at the beginning of the year. Then we reflected on whether or not we have reached our 2nd grade goals. We have 3 months left and we all hope to reach our goals!
