

Mrs. DeLeon's 2nd Grade News

November 2009

We are thankful!!!

This month we have identified all of the things that we are thankful for. To name a few that we are thankful for is our family, school, food, clothes, and health. We all must remember to be thankful for these special things all year round and not just on Thanksgiving.

The picture below shows us taking the time to enjoy our world.

The class learned that by working as a team they were able to make the largest leaf pile that they all could enjoy!

In social studies we have completed our unit on rural, urban, and suburban communities. Below is a landscape map of what these 3 communities can look like.

During writers workshop we are learning how to write friendly letters. Our next project will be to work with Ms. Shelly's 2nd grade class to send letters to other children all over the country. We hope to receive some letters back!

For math we are starting mental math. Mental math is when you do math in your head.

In reading we will complete our unit 2 benchmark exam. This is a test to show all that we have learned over the past 5 weeks. We have learned so much and the students will do great!!!

Thank you all for coming for teacher conferences. I enjoyed seeing you all again. It is very helpful to the school community that we work together to enrich the children's lives. THANK YOU!

With the Holiday season & cold weather upon us we must remember to keep reading and stay focused!!!!
