
Learning is Fun!

We've had fun learning this week. The children played memory with math vocabulary cards, participated in a partner activity to add 3-digit numbers, sang a song with hand motions during science, and read aloud to their buddies. Also, we role-played taking care of each others feelings. The children loved these activities so much that some chose to do them during recess! Next week, prepare to hear about our hands-on erosion activity!
