

## How to Draw

Drawing can be an amazing career for some of us. Drawing gives you a chance to express your feelings and can make someone else laugh. You can draw for many reasons like for entertainment, to warn or to persuade someone to buy something.

To start you need to get all of the right equipment. First you need a pencil, pen or a sketching marker. Then you need a piece of paper, sketch book or a lined notebook. Maybe you could get a pack of markers or a pack of colored pencils if you want to color it in after.

To continue you have to get ready to draw and think of what you want to draw. It depends on what you are drawing and how you are with drawing. If you're an expert, use whatever you want, but if you are not then you should use pencil then trace over it with a marker. If you are drawing a big picture, like a dragon, that would be a good step for you to do. If you decide that you want to you can color it with colored pencil, marker or paint.

When you finish drawing, then you show it off or sell it. Some people just do it for fun and to pass the time. Other people may not like your drawings but sometimes you don't have to listen to them. Now that you know how to draw you can draw whatever you can like. At some libraries you can get a helpful guide. So pick up a pen and have some fun.
