

### How to Play Pool

Pool is a pretty cool game and with the right skills you can have a killer time! Pool is often a long game, so you will need patience. It takes a lot of effort to become a professional pool player. It can also be very entertaining to watch and just to play for fun.

To begin playing pool you need 15 balls on a pool table. Then you rack them in order from least to greatest going clockwise. Take the rack off of the triangle of balls and put them on the line shown on a pool table. Put the cue ball on the

opposite side of the colored balls. Then, hit the cue ball with force to try and hit as many colored balls you can in any pocket.

To end the game, you need to hit all of the balls in except for the cue and eight ball, until the end of the game. If you can do that, all you have to do to win is hit the cue then the eight ball in any pocket. So have fun, set up a game, and call over a friend. Give pool a try. You may not be good at it at first, but you'll get the hang of it. Trust me you will have a good time!
