

HOW TO DO CAKES!

Baking a cake is very cool to me. I especially like eating it. I'm going to tell you how to make these scrumptious cakes. These cakes are very flavorful.

To start you will need to gather all your items. The first ingredients you need are 3 eggs, $\frac{1}{2}$ cup of water, $1 \frac{1}{4}$ cup of oil and cake mix. Then you mix all of them together with an electric mixer.

To continue, put the batter in a greased pan and let it set there for 5 minutes. Then I will preheat the oven to 350 degrees.

Next, put it in the oven and let it bake for 35 to 45 minutes. Don't forget to set a timer! When the timer goes off take the cake out of the oven and let it cool off for 20 minutes. To finish, open a can of frosting and spread it on the cake. You can also use sprinkles! Get a plate and knife ready.

Cakes might not be easy for you but you still need to try. When you're finished you can enjoy your hard work.
